Subject: Genetically Engineered Foods
Sensitivity: Personal

Robert Lake

To Whom It May Concern:

I am writing you on behalf of genetically engineered foods and bovine growth hormone. I feel it is a disservice to the consumer that milk is being processed in this way with no warning to the consumer and we feed our children and families this without knowledge of the long or short term effect of these products on the human body. Please take into consideration the people who are buying these products without a clue as to what they are really putting into their bodies.
